

SKF Lincoln Compact lubrication pump series CLP Smart

Smart monitoring at its easiest

Pumps can wirelessly be monitored, controlled and set using the SKF eLube App

SMART,
EASY AND
INTUITIVE

Offering connected performance

The SKF Lincoln Compact lubrication pump series (CLP) is the first of the new SKF eLube generation. It is designed for small progressive lubrication systems.

The lightweight, simple and easy-to-use pump stands out with its compact design and reliable functionality in mobile and industrial applications. To fit the specific needs of the applications, several electrical and monitoring features have been tailored.

All models are suitable for grease applications and come with a follower plate to ensure continuous grease flow. To refill the pumps easily, they are equipped with an easy-to-access standard grease nipple. The fill level can be visually monitored at each pump model.

The Lincoln Compact lubrication pumps (CLP) in the control variant Smart come with an integrated control board with a smart panel and datalogger, which can be controlled using the SKF eLube app.

CLP Smart pumps provide need-based lubrication for any application by offering three different operation modes (time, counter and progressive cycle controlled).

Users can determine lubricant levels and pump functions remotely via SKF's eLube App. There is no need to stop the machine or physically access the pump in order to check lubricant levels, for instance. This can save time, and also reduce the risk of accidents.

Wireless access to pump information helps to spot problems – such as a blocked line, or low lubricant levels – very quickly. Remedial action can then be taken immediately, to avoid damage to the bearing. In the case of machine failure, an equipment owner can easily check whether malfunction warnings have been adhered to.

While the pump works well as a standalone product, its full performance is only enabled by the App.

Lincoln Compact lubrication pump CLP Smart in detail

* Depending on model

Features and benefits

- Visual-level monitoring
- Lubricant: greases NLGI 0 to 2
- 1-liter reservoir
- Filling from bottom by grease nipple
- Follower plate
- Up to two pump elements in three positions
- Connects via Bluetooth to devices using the SKF eLube App
- Easy and intuitive setting of pump configuration
- Share settings via email and WhatsApp
- Clear visual indication of operational status
- Early warning of potential failures to take preventive action
- Log book functionality:
 - Track and save events with time stamp
 - Share entries via email and WhatsApp

SKF eLube App allows swift remedial action

SKF's eLube App identifies lubrication issues, monitors machine health and receives early warning of potential failures – which allows swift remedial action.

The App connects automatically to the pumps and controllers in reach, via Bluetooth. Functions such as lubrication status are displayed on mobile devices such as smartphones and tablets. For instance, the App can monitor the fill level of a pump, its general working state and its working mode.

Equipment function can be tested by starting a manual lubrication cycle directly from the App.

The App gives access to all errors, warnings and events in a logbook. Reports are saved automatically and can be sent via email or shared via several communication applications.

This allows equipment owners to see if their machinery has been treated properly. For instance, the owner of an excavator can check whether a contractor has acted on key information – such as a re-lubrication warning. This helps identify responsibility for failures if making warranty claims.

Users can edit and apply settings – such as cycle time or number of cycles per working time – for each product in the range. Settings can be easily copied to several pumps.

Each user logs into the App individually. This allows user actions to be authenticated in status reports. All users can access the pump status. Active control and setting functions are password protected giving a new way of managing pumps in a fleet.

Easy and intuitive setting of pump configuration

Connect the SKF eLube app with a CLP pump
Access basic pump information
Change pump settings

Clear visual indication of operational status

When accessing the monitor screen, users have at all time the possibility to initiate an additional lubrication cycle to check pump functionality.

Log book entries

Access log book entries in three categories: events, warnings and errors

Review log book details with time stamp and share via e-mail or several communication applications

Pre-defined models make ordering easy and improve lead time

The easiest and fastest way to order the Lincoln Compact lubrication pumps (CLP) is to choose a pre-defined package. By ordering such a standard model, you get a fully equipped pump specifically configured for mobile or industrial use. These packages meet all standard requirements of these applications.

CLP Smart 12V for mobile use

Material number CLP-EG1CM1-0000065

- 12 V DC
- Compliance E1/ CE
- Pump element 6
- Integrated control board with smart panel and datalogger
- Preset internal control mode: Time-controlled

- + Bayonet plug, 7 pole A coded¹⁾³⁾⁴⁾⁵⁾, on the left
- + M12×1, 5 pole B coded²⁾, on the right

CLP Smart 24V for mobile use

Material number CLP-EG1CM2-0000066

- 24 V DC
- Compliance E1/ CE
- Pump element 6
- Integrated control board with smart panel and datalogger
- Preset internal control mode: Time-controlled

- + Bayonet plug, 7 pole A coded¹⁾³⁾⁴⁾⁵⁾, on the left
- + M12×1, 5 pole B coded²⁾, on the right

CLP Smart 24V for industrial use

Material number CLP-XG1CM2-0000067

- 24 V DC
- Compliance CE
- Pump element 6
- Integrated control board with smart panel and datalogger
- Preset internal control mode: Counter-controlled

- + Square plug, A coded¹⁾⁵⁾, on the left
- + M12×1, 4 pole A coded³⁾⁴⁾, on the left
- + M12×1, 5 pole B coded²⁾, on the right

CLP Smart 12V for mobile use

Material number CLP-EG1CM1-0000072

- 12 V DC
- Compliance E1/ CE
- Pump element 6
- Integrated control board with smart panel and datalogger
- Preset internal control mode: Time-controlled

- + Bayonet plug CS, 7 pole A-coded¹⁾²⁾³⁾⁴⁾⁵⁾, on the left

CLP Smart 24V for mobile use

Material number CLP-EG1CM2-0000073

- 24 V DC
- Compliance E1/ CE
- Pump element 6
- Integrated control board with smart panel and datalogger
- Preset internal control mode: Time-controlled

- + Bayonet plug CS, 7 pole A-coded¹⁾²⁾³⁾⁴⁾⁵⁾, on the right

For all mobile versions:

Users can take advantage of operating the pump via the machine's ignition while the pump is always in a standby state, and once the machine ignition is turned on, the pump starts working.

This saves lubricant and reduces the environmental impact, as the pump only works when the machine's bearings are moving and need the lubricant the most.

1 Power
2 Signal input: Cycle switch (CS)
3 Signal output: Error
4 Signal input: Extra lubrication
5 Signal input: Ignition / machine contact

NOTE!

Models CLP-EG1CM1-0000072 and CLP-EG1CM2-0000073 can replace existing KFAS installations using the same cables. These models come with a 7-pole bayonet plug that includes the cycle switch connection.

Customers can choose between models with 12 or 24 V DC.

Technical data for all CLP Smart models

Function principle	Electrically operated lubrication pump	
Lubricants	Greases: NLGI 0 to 2	
Max. working pressure	270 bar	3 916 psi
Operating temperature	-25 to +65°C	-13 to +149°F
Usable reservoir volume	1 l	0.26 gal
Number of pump elements	max. 2	
Pump element ¹⁾	6	
Lubricant output ²⁾	~3 cm ³ /min	~1.83 in ³ /min
IP-protection class ³⁾	IP 6K9K	
Corrosion class	C3	
Voltages	12 / 24 V DC	
Operating current	up to 3 A (max. peak), nominal 1,2 A	
Relative duty cycle	15% ED S3 30 minutes	
Electrical protection class	III	
Outlet connection	G1/4	
Mounting position	Upright	
Dimensions (max. H×W×D ⁴⁾)	235×187×190 mm	9.25×7.36×7.48 in
Weight (empty)	5 kg	11 lb

¹⁾ Pump element 6 is included in the standard packages (→page 4).

Other pump elements can be ordered using the spare part / additional component list (→page 6/7)

²⁾ Lubricant output depending on pump element

³⁾ Protection class depending on electrical connection

⁴⁾ Depth with standard filling nipple

NOTE!

The CLP Smart pump includes a Bluetooth radio module and is therefore considered a radio system. Radio system approval and compliance guidelines vary significantly from region to region and can change. The CLP Smart may only be used in the approved countries or regions.

You can find a list of approved countries and regions on the website.

Get the SKF eLube app

The SKF eLube app can help you identify lubrication issues, track machine health data, get early warning of potential failures and take preventive action.

The app connects automatically to all eLube products in reach, monitors the lubrication status and indicates the system health at a glance. You can easily monitor the filling level of the pump, the general working state and the working mode. To test the function of the equipment, you can start a manual lubrication cycle directly from the app.

You can access all errors, warnings and events in a log book. Reports are saved automatically and you can have them sent by email. The log book functionality allows you to check if your equipment was treated properly.

For each product you can edit and apply settings like cycle time and number of cycles per working time.

Each user needs to log in individually. This allows to authenticate user actions in the status reports. Very few user actions are password protected. A 'demo mode' function is also available.

SKF eLube app supports SKF lubrication products with control board and Bluetooth connection.
